RE: 1517 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1701 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1714 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1828 E Menlo Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1624 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1639 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1710 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1915 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3534A N Cramer St

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3613 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3705 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3807 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3835 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3874 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3607 N Murray Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1614 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1619 E Menlo Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1703 E Menlo Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 3849 N Morris Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.

RE: 1814 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

**A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).**

An agreement form has been mailed to the property owner of the above address. It is the responsibility of the owner and tenants to coordinate access to the property's water meter located in the basement of the structure.

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project. Please note that failure to provide access for the required replacement may ultimately result in a discontinuation of water service to the property.
