RE: 1502 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

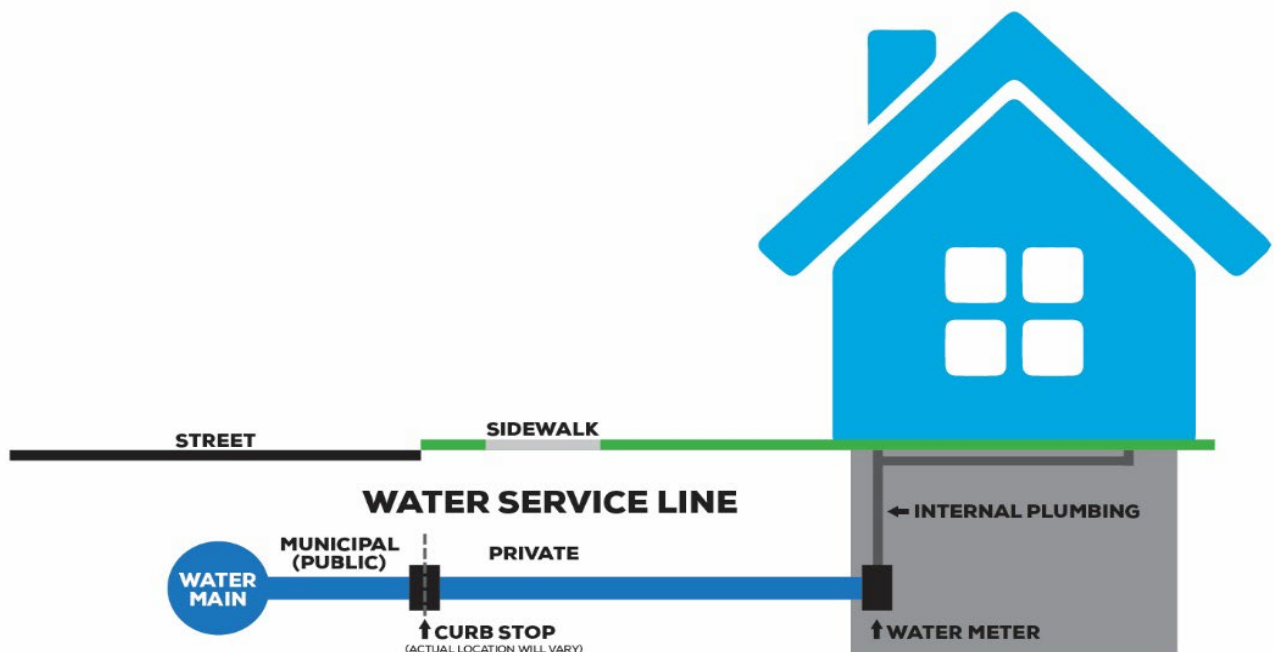

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director
Department of Public Works

The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

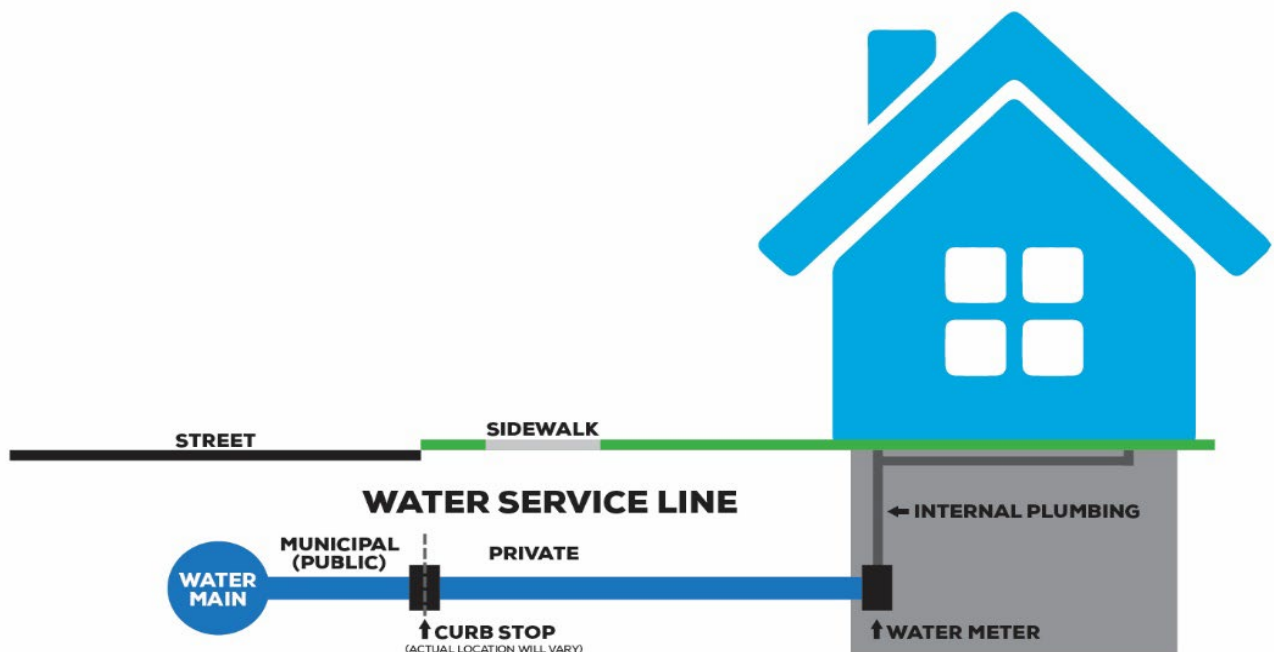

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Shorewood Residential, LLC
PO Box 510932
Milwaukee, WI 53203

RE: 1717 E Beverly Rd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

RE: 1817 E Menlo Blvd

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

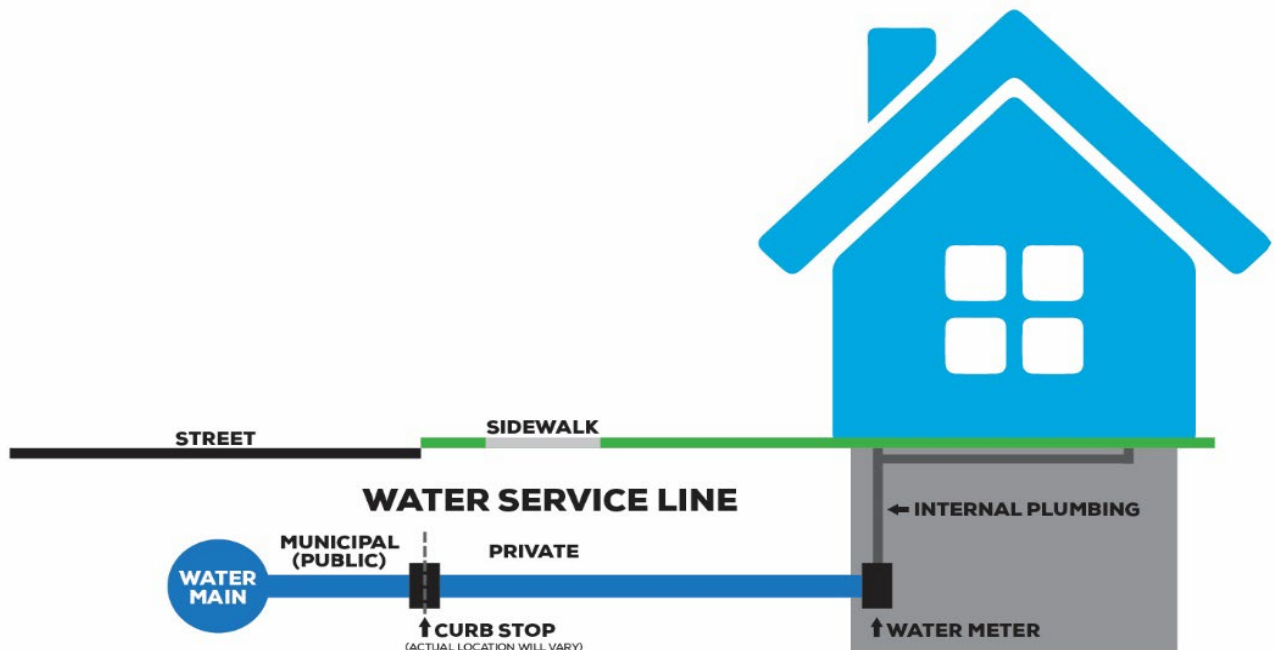

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

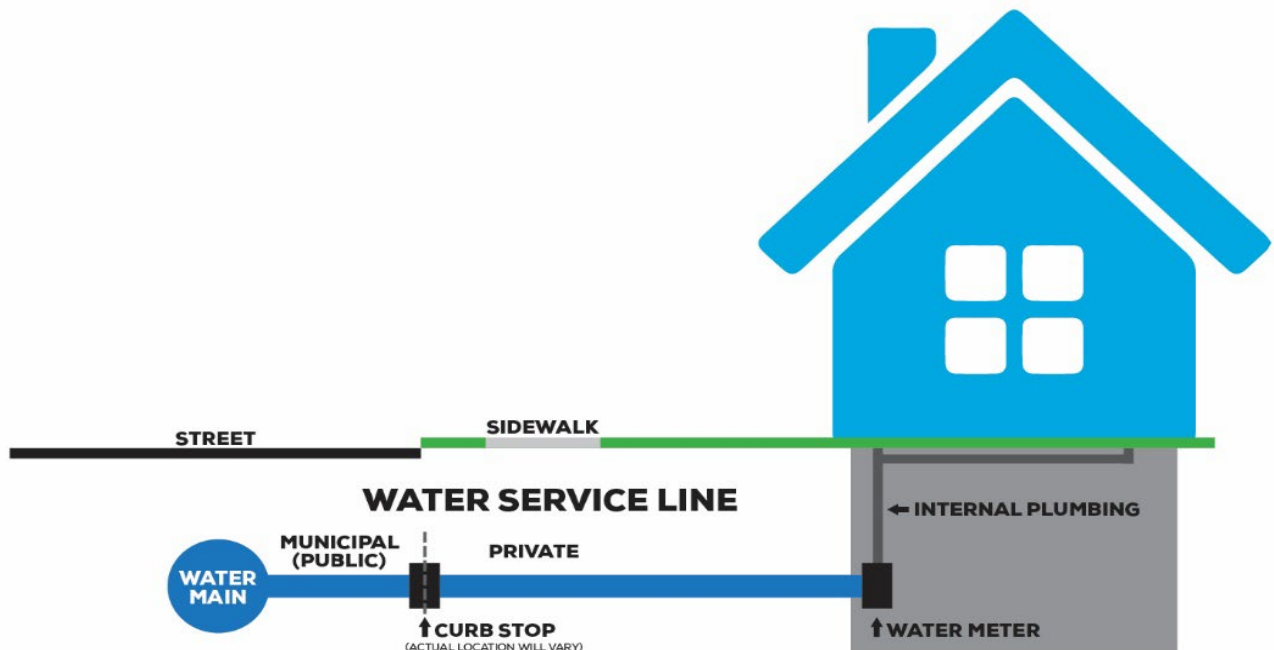

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 1614 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

RE: 1641 E Newton Ave

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

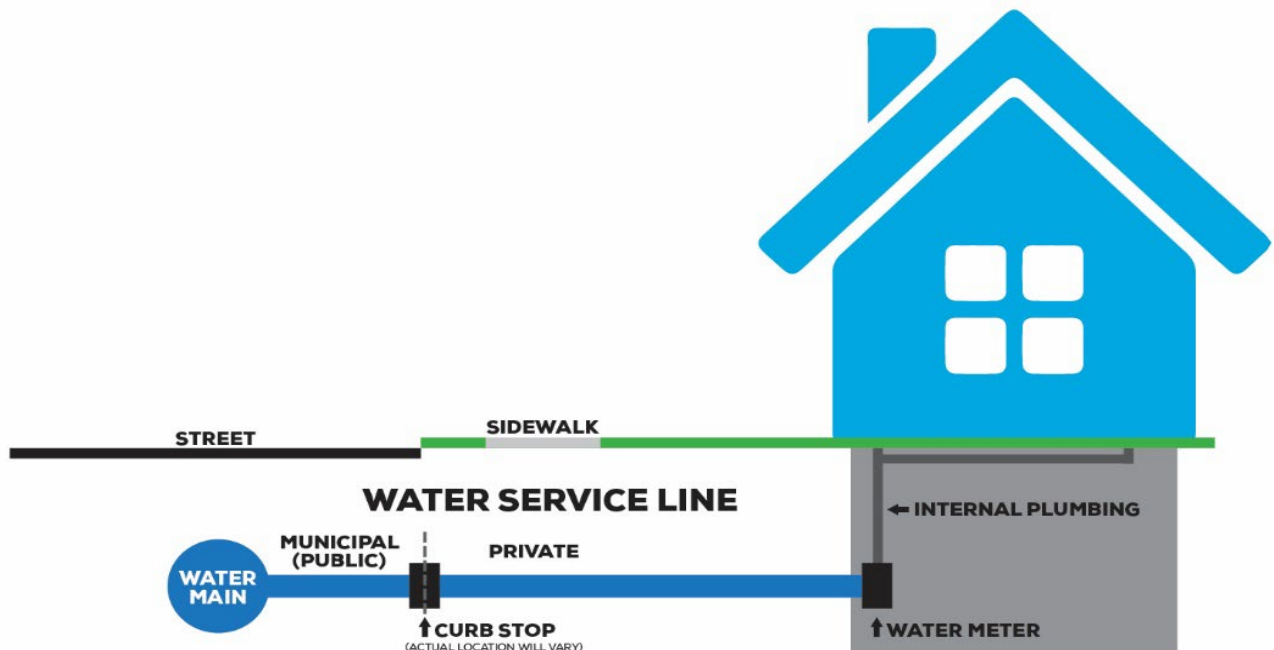

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

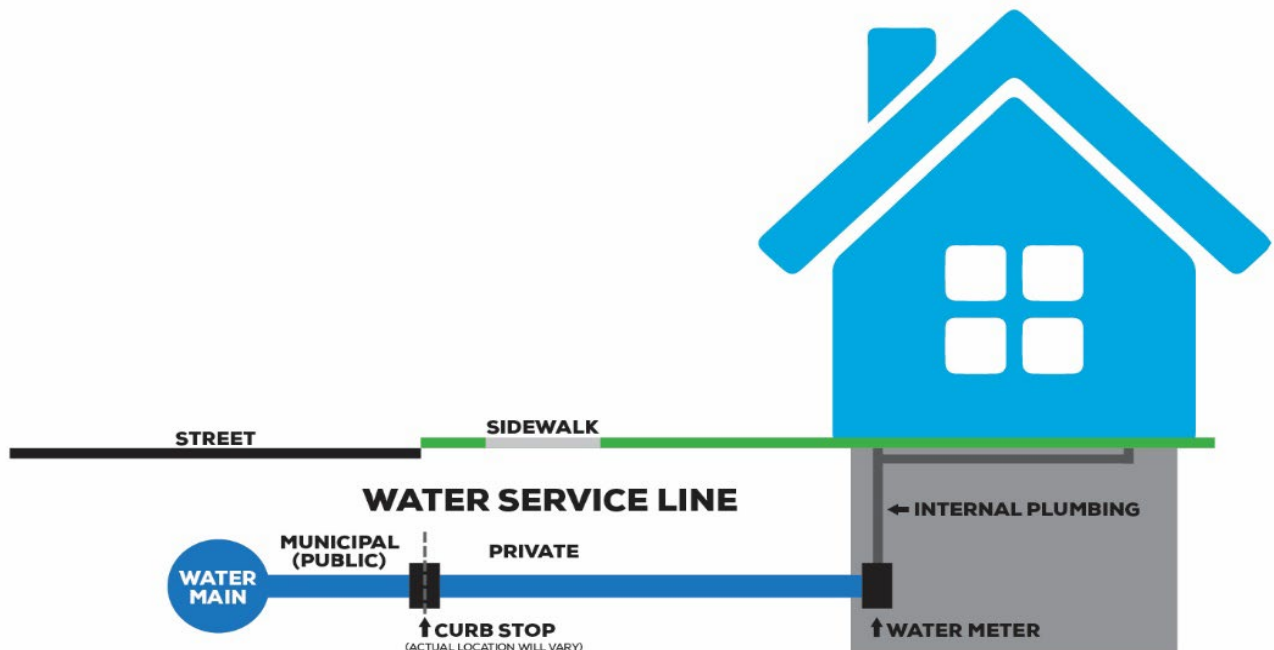

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 1401 E PINEDALE CT

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

RE: 3820 N BARTLETT AVE

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

RE: 3526 N CRAMER ST

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

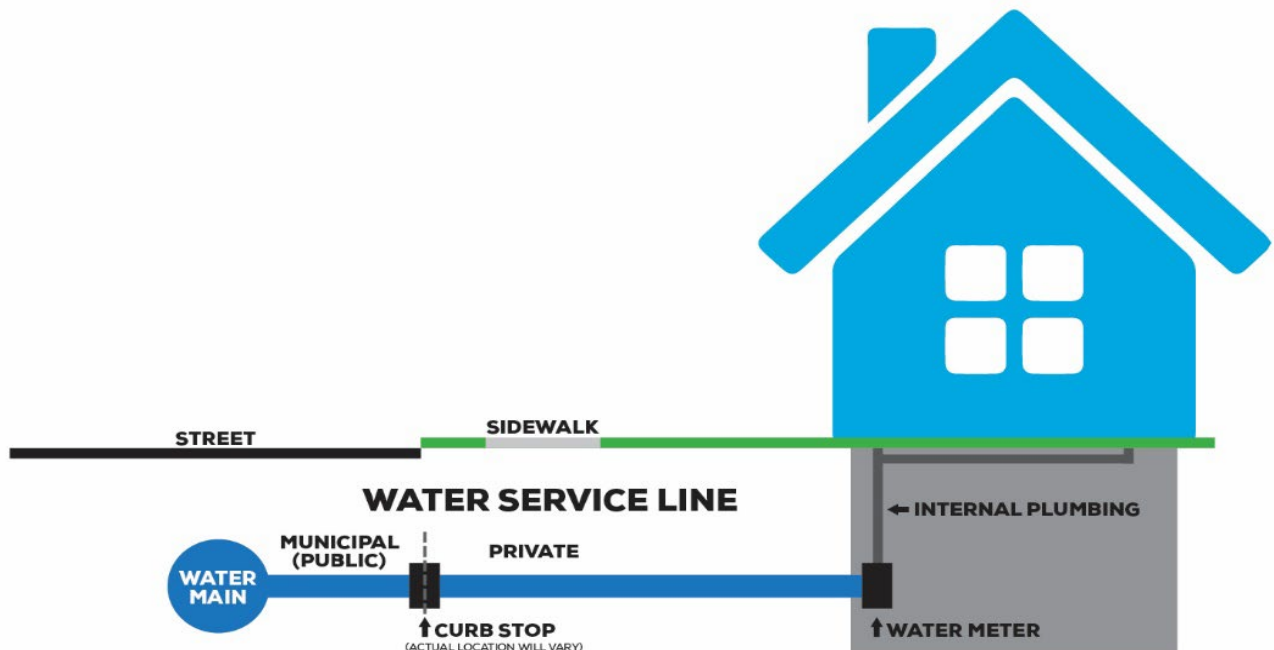

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

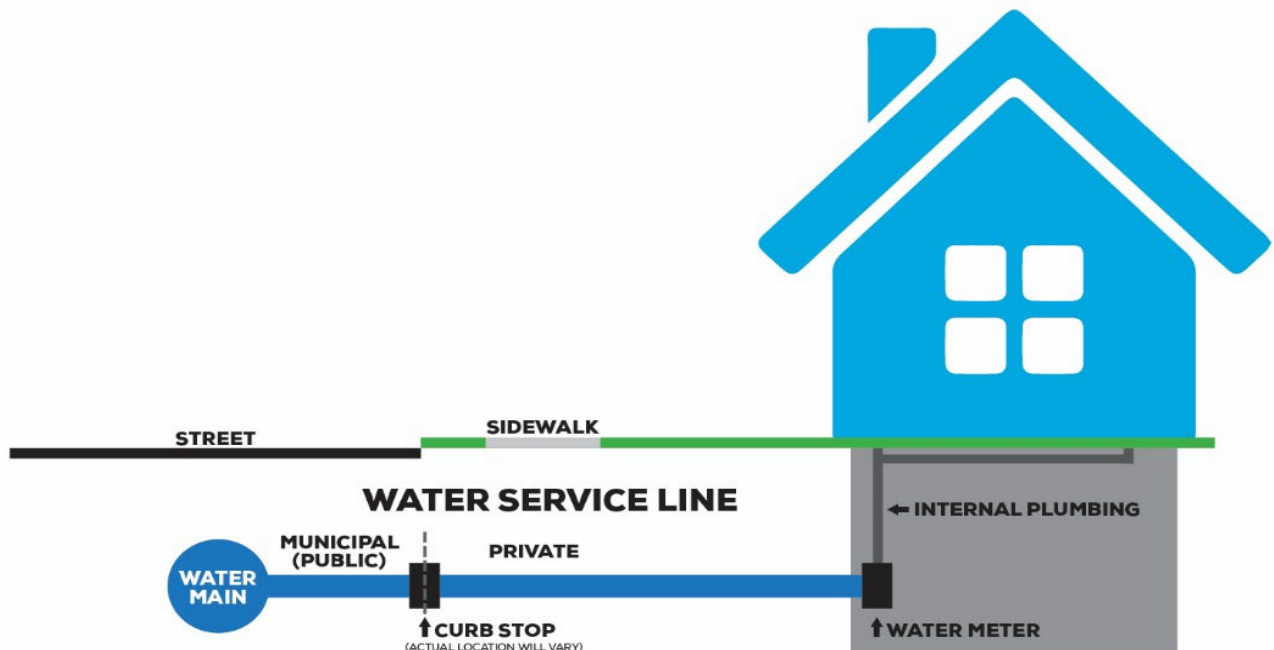

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 3549 N CRAMER ST

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

RE: 3611 N MORRIS BLVD

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

RE: 3717 N MORRIS BLVD

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

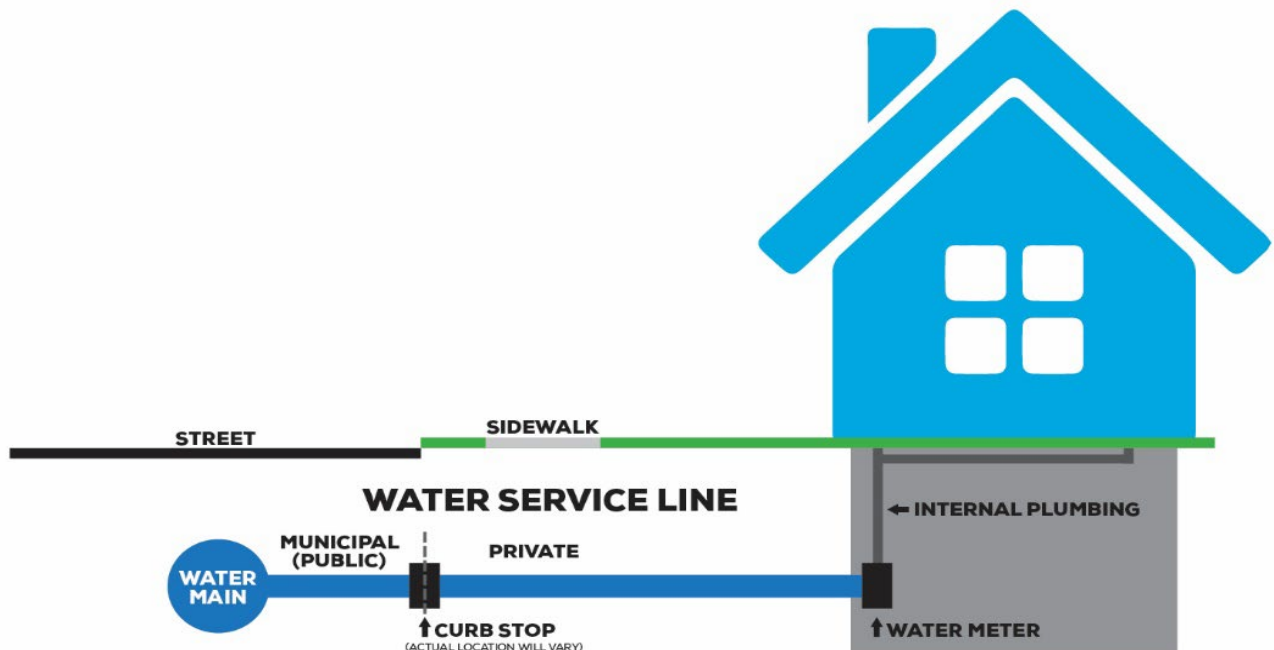

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

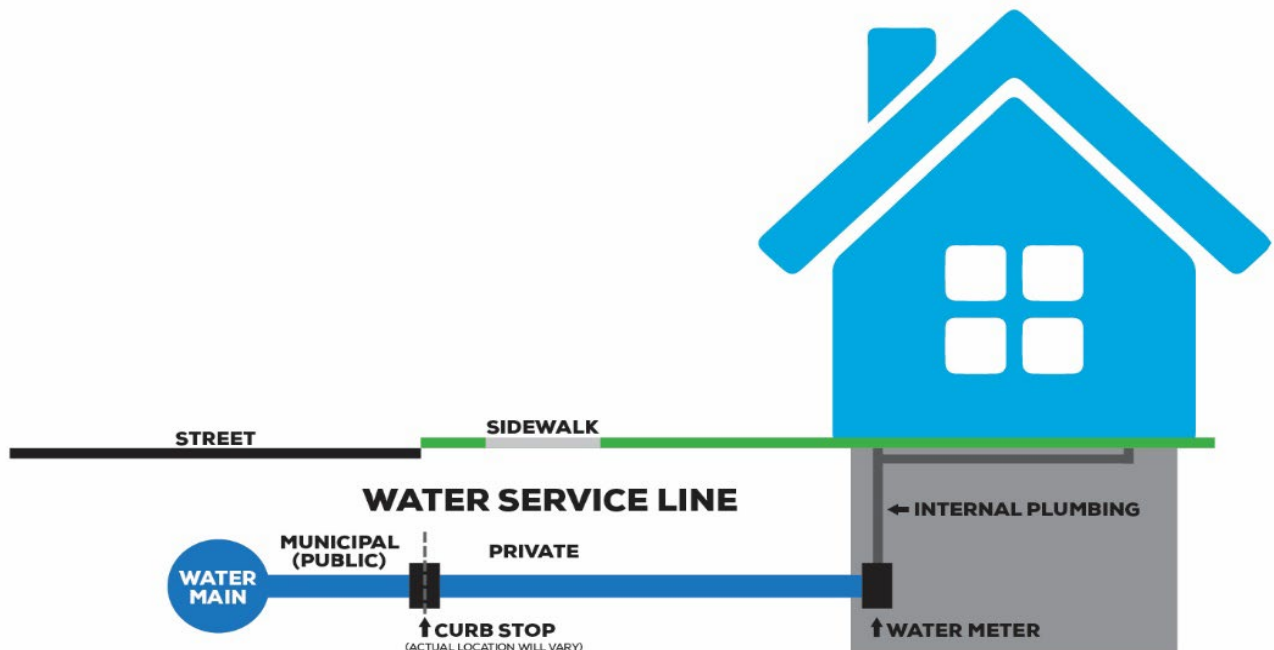

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 3919 N MORRIS BLVD

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

RE: 3547 N MURRAY AVE

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

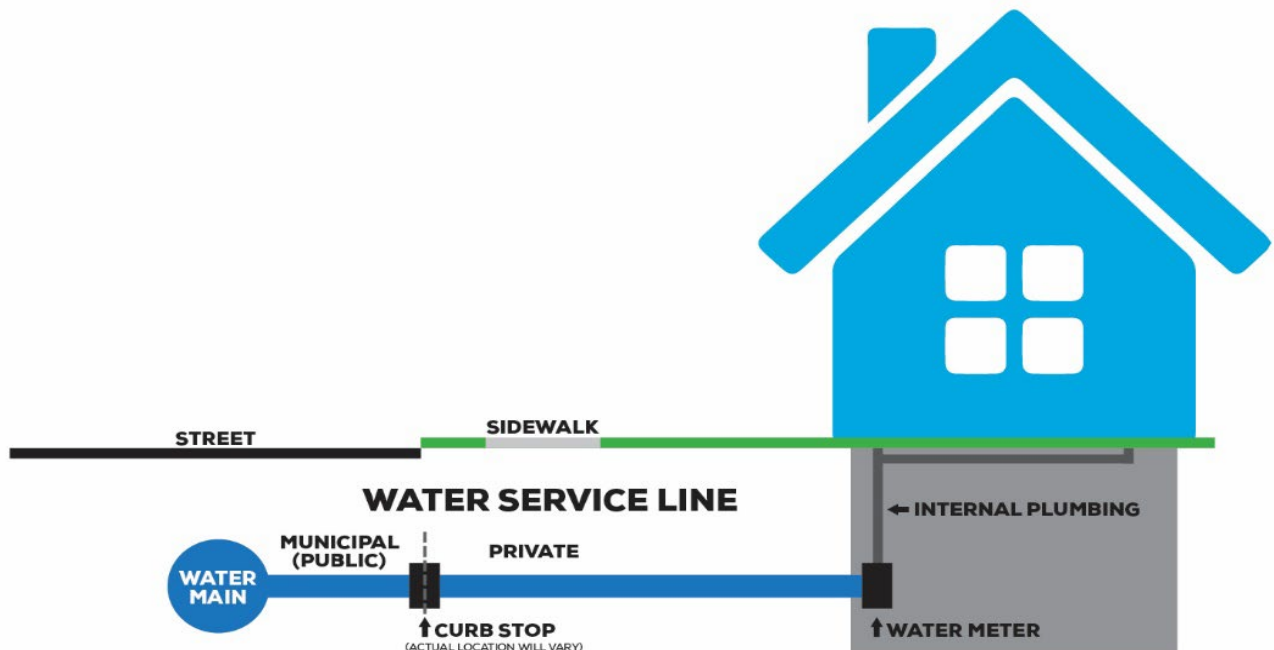

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

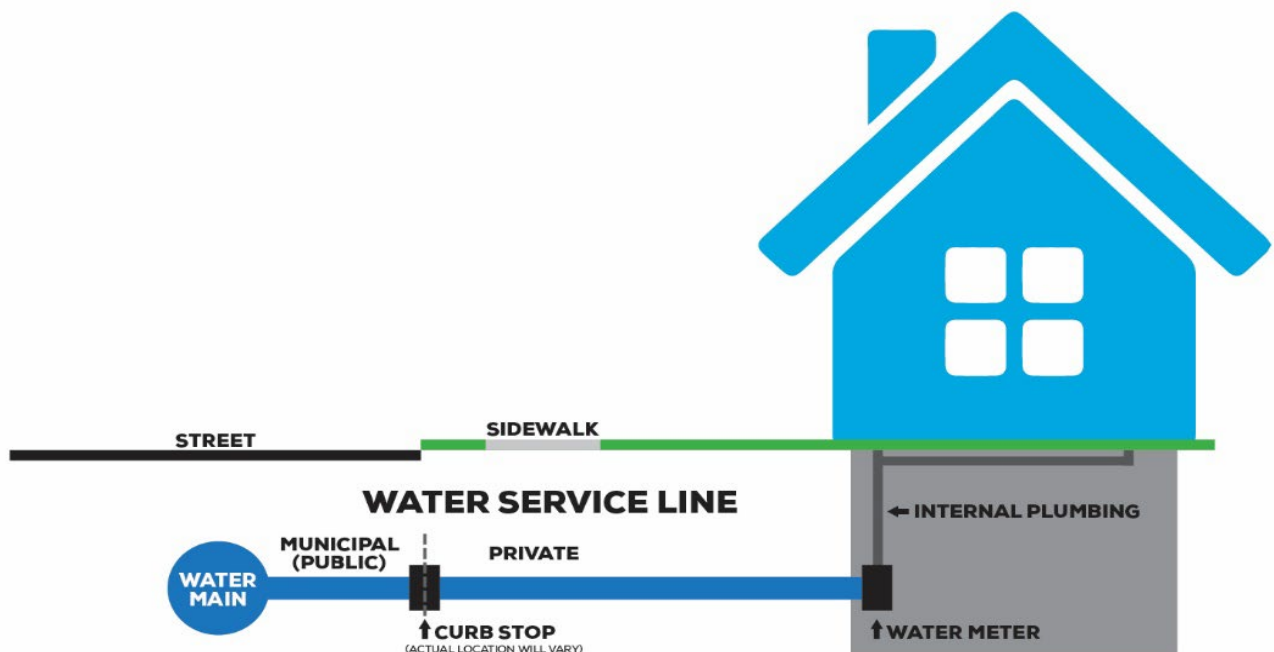

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 3820 N NEWHALL ST

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

SHOREWOOD, WI 53211

RE: 3825 N BARTLETT AVE

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

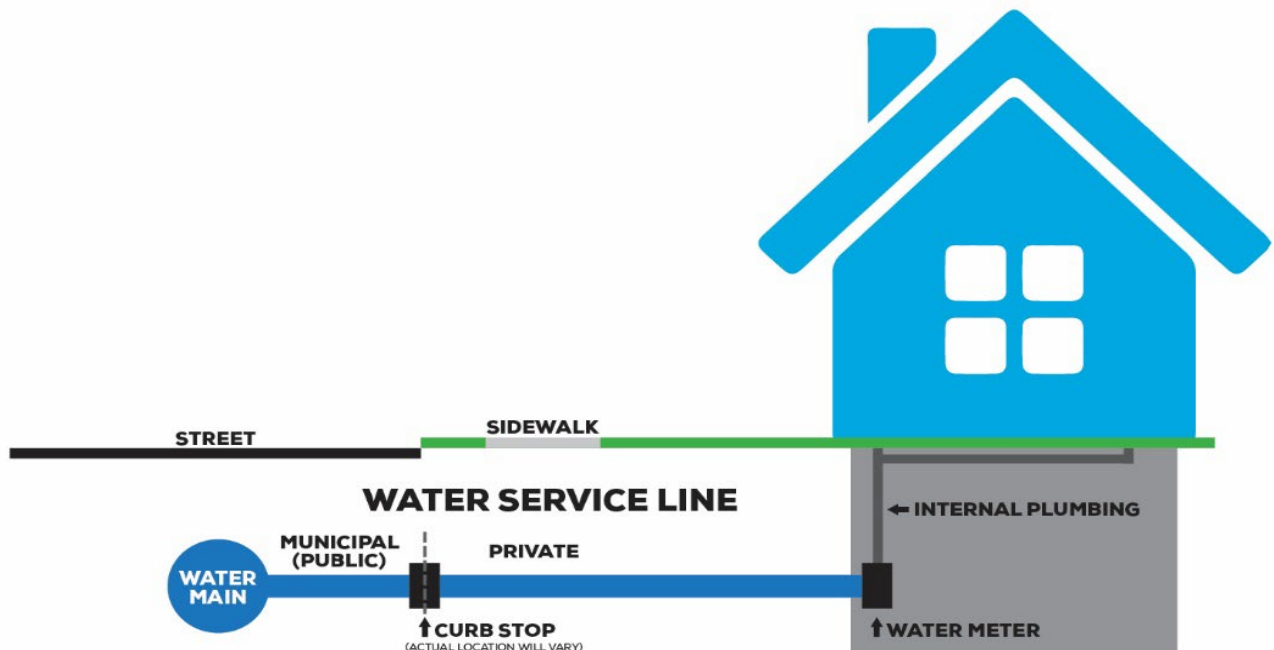

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

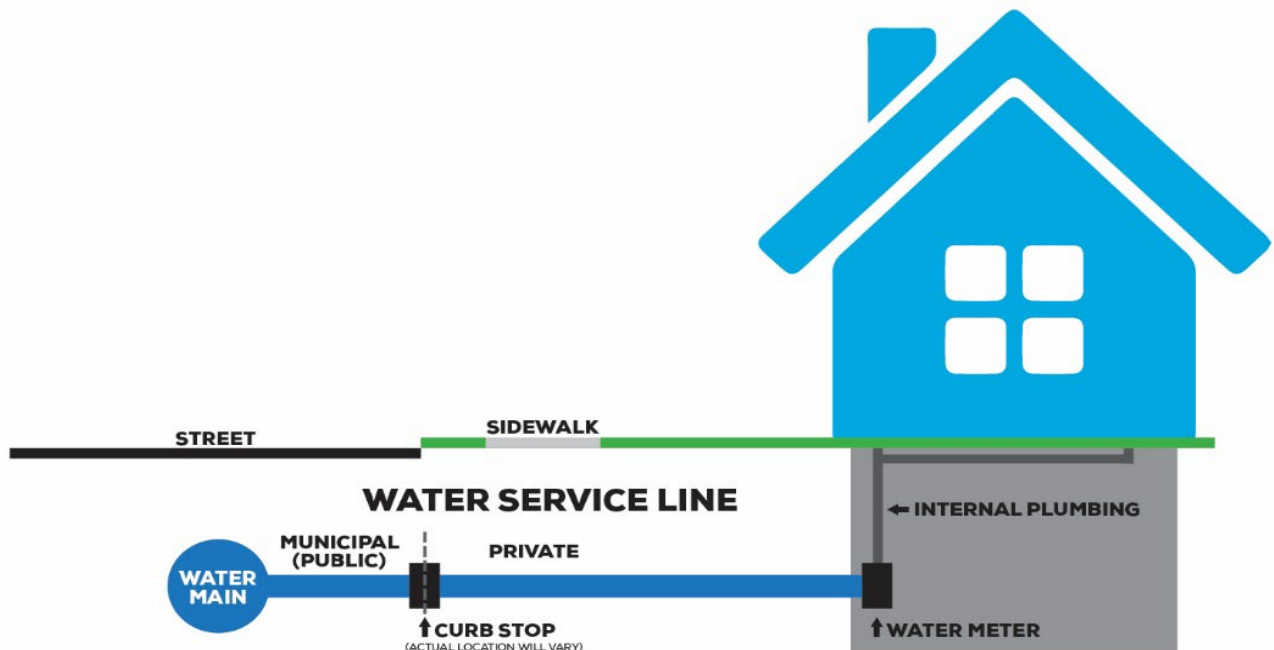

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

RE: 1608 E MENLO BLVD

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

RE: 1703 E MENLO BLVD

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

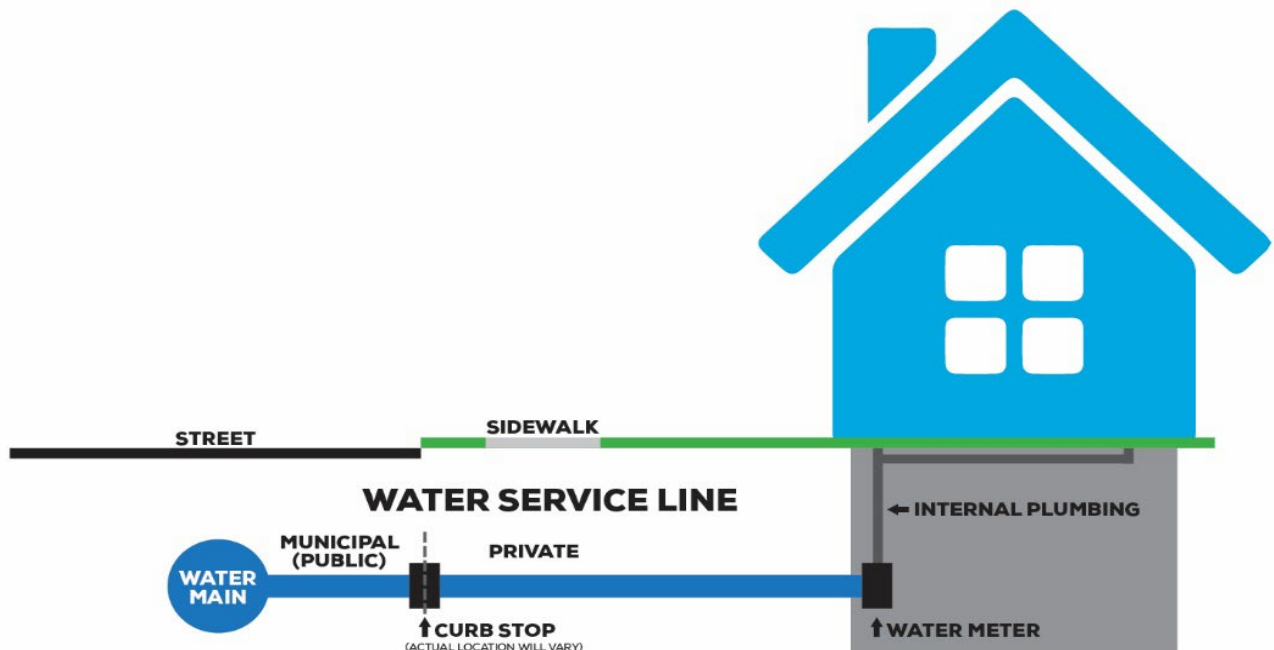

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

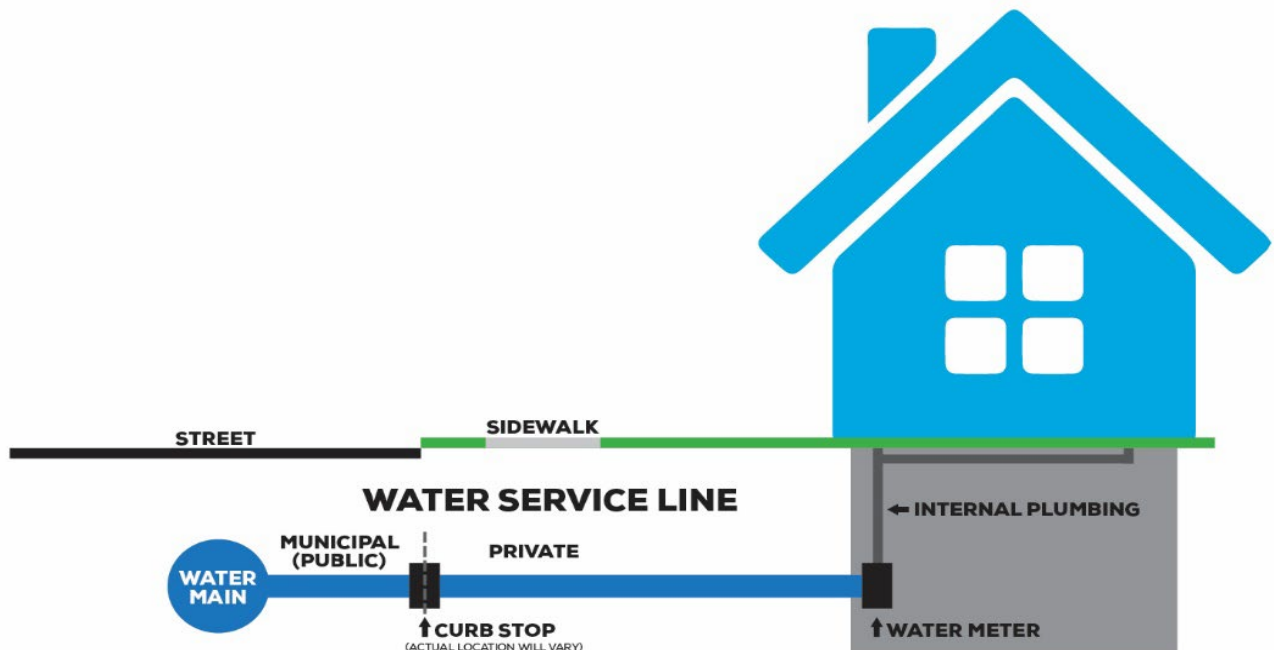

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

Leeann Butschlick, Director

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.

Work is anticipated to begin in late October 2025. Access to the interior of the structure is necessary and the Village's contractor, Five Star Energy Services, will contact property owners at the number provided to schedule the service line replacement. The replacement generally takes a few hours and, in most cases, does not require excavation of the yard. An area approximately 10 feet by 10 feet must be clear around the meter to provide the necessary work zone. The project includes restoration of the floor and/or wall where the service line enters the home but does not include replacement of decorative finishes.

The Village of Shorewood Department of Public Works
3801 N Morris Blvd • Shorewood, Wisconsin 53211-2303
414.847.2650 • Fax 414.847.2651 • www.villageofshorewood.org

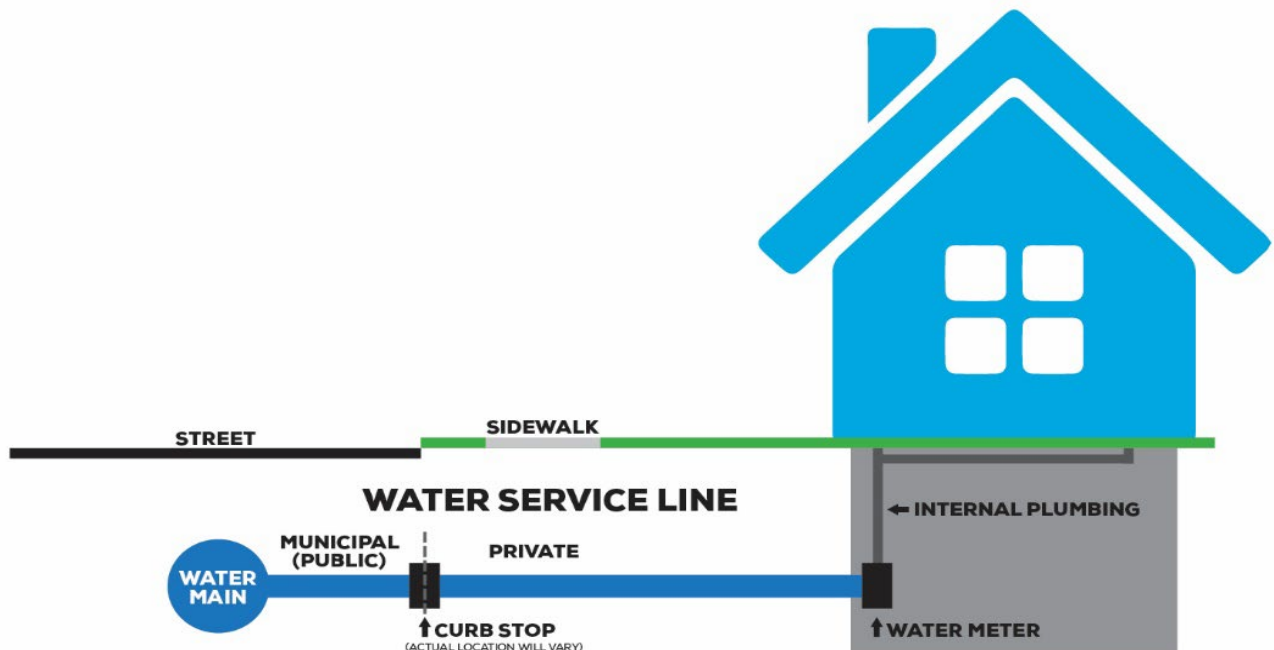

The enclosed agreement form for the service line replacement must be completed by the property owner. Upon completion, the form may be forwarded to the address below or via email to dpw@shorewoodwi.gov. Please note that failure to provide access for the required replacement will impact upon your eligibility for future financial assistance and may ultimately result in a discontinuation of water service to the property.

If you should have any questions, please contact me at (414) 847-2650 or via email at lbutschlick@shorewoodwi.gov. Additional information regarding the Village's Lead Service Line Replacement Program will be shared at the open house and may also be found at www.villageofshorewood.org/leadservices.

Sincerely,

RE: 1910 E NEWTON AVE

Dear Resident/Shorewood Property Owner,

To comply with recent federal requirements, the Village of Shorewood has begun replacing lead water service lines. **Our records indicate that the privately owned portion of the water service at the above address is lead.**

The Shorewood Village Board has approved a 2025-26 private lead service line replacement program which includes this property. Bipartisan Infrastructure Law (BIL) funding has been awarded for the project and will cover 75% of the cost of the service line replacement. The remaining cost, *estimated* at \$750, is the responsibility of the property owner and can be paid in 12 installments over a three-year period (reflected as a charge on the quarterly utility bill).

A project information open house is scheduled for Thursday, September 11 from 5:30 p.m. to 7:30 p.m. in the Shorewood Village Center (Library lower level).

Please see the reverse for an illustration of water service line ownership. Per Shorewood Ordinance 3043, the replacement of the private service (from the curb stop valve into the home) is **mandatory** during a Village infrastructure project.
